

Driveway Pre-Pour Instructions

What Is Required?

Sanitary Cleanout

- Must be visible, at grade, straight and topped with DF66 cast iron caps (can be purchased from Underground Specialties 519-737-1263)

Storm Cleanout

- Must be visible, at grade, straight and topped with DF66 cast iron caps (Can be purchased from Underground Specialties 519-737-1263)

All cleanouts require an inspection regardless if they are located in the driveway or the yard

Water Service Connection

- Must be visible, at grade, straight and operational with a water service key

Driveway

- Must have forms in place for hard surfacing (no wire mesh in the Municipal right-of-way)
- Grading must be 6" deep from the road to the property line
- Width of the driveway cannot exceed **25 feet** from the road to the property line

Final Result

Once these requirements have been completed - please call the Public Works Division at 519-728-2488 to request a driveway pre-pour inspection.

Please allow 2-5 business days for the inspection to be completed. You will be notified of the inspection results by a door knocker. An additional 2-5 business days will be required if a second inspection is needed to review any deficiencies.

Residents will be charged a \$56.00 fee for not properly being prepared for the inspection as a subsequent visit will be required. Further, should the driveway be poured prior to a passing inspection, the indemnity deposit of \$1300.00 will be forfeited.
